

ECOSTACK

DEMO DAYS

Live demonstration focused on **green waste recycling and high-volume material processing**. Featuring shredding and screening solutions designed to convert yard waste, organics, wood waste, and mixed materials into clean, usable products—efficiently, reliably, and on a large scale.

June 17 – 18th
Kansas City Composting
2008 E. 171st Street
Belton, MO 64012

June 17 – 18th

Kansas City Composting

2008 E. 171st Street, Belton, MO 64012

Morning Session Starts at 8 AM

Afternoon Session Starts at 1 PM

Designed for Green Waste & Material Processing Operations

This demo addresses real-world challenges such as:

- Yard waste and brush recycling
- Organic material and compost feedstock preparation
- Wood and mulch production
- Mixed green waste with contamination
- High-volume seasonal material surges

You'll see equipment that not only processes material but also helps you meet diversion targets, enhance product quality, and keep materials moving.
